Profile

Curious and motivated junior developer with experience in both frontend and backend development, actively transitioning into Full Stack and DevOps. Passionate about understanding the full product development cycle - from UI to cloud deployment. Currently engaged in volunteer IT projects and advanced DevOps studies.

Skills

- **Frontend:** HTML, CSS3, JavaScript, TypeScript, React, Redux
- **Backend:** Python, Django, Node.js
- **Databases:** SQLite, PostgreSQL, MongoDB
- **DevOps & Cloud:** Docker, Kubernetes, Terraform, AWS, GitHub Actions, CI/CD
- **Tools & Editors:** Git, Webpack, Gulp, Parcel, Vite, Emacs, VS Code, PyCharm

Projects

F1 Store (DevOps Simulation Project)

Built CI/CD pipeline and deployed containerized services to AWS using Kubernetes. Automated infrastructure provisioning with Terraform. Focused on system scalability, fault-tolerance, and monitoring.

Volunteer Platform Website (Personal Project)

Developed frontend and backend using Django REST and React. Implemented authentication, admin dashboard, reusable components.

Filmoteka (Team Hackathon Project)

Used REST API, search, pagination, dynamic content rendering.

GitHub: [Filmoteka](#)

Personal Blog

Built with Django, PostgreSQL, reusable templates.

GitHub: [Blog-Django](#)

Landing Pages: WebStudio & Barbershop

Clean semantic markup, responsive design.

WebStudio: [WebStudio](#) | Barbershop: [Barbershop](#)

Education

DevOps Engineering (Ongoing) – THE-GAME-EDUCATION

Docker, Kubernetes, Terraform, AWS | Backend with Python

Fullstack Development (Ongoing) – IT School GoIT

JavaScript, React, TypeScript, Node.js

Python/Django Development – Beetroot Academy, Gothenburg

Transport Logistics – Kharkiv National Automobile Road University

Swedish Language Studies – Komvux ABF

Completed SFI, currently studying at Grundläggande nivå

Languages

- Ukrainian — Native
- Russian — Native
- English — Intermediate
- Swedish — Grundläggande nivå (currently studying)
