**SUMMARY:** I am a FullStack developer driven to achieve high performance in the field of programming. I possess a deep understanding of databases and APIs, enabling me to successfully tackle complex programming tasks. My advantage lies in quickly grasping new technologies and being ready to implement innovations, thereby delivering results under any development conditions. My primary goal is continuous improvement of my skills and contributing to the team's success by actively participating in projects focused on innovation and pioneering solutions.

### Skills and Qualifications:

- Knowledge of Python and Django.
- Familiarity with Docker and Kubernetes.
- Understanding of SQLite, PostgreSQL, and RESTful API.
- Skills with various technical tools and programs.
- HTML5, CSS3, SASS, JavaScript, TypeScript, React, Node.js
- REST API, Redux, Git, Webpack/Gulp, Parcel, Bootstrap
- VS Code, Pycharm, Emacs

### PROJECT EXPERIENCE:

**WebStudio.** Technologies: *HTML, SASS, JS*. Service-oriented website developed using HTML and CSS, featuring a clean, user-friendly interface showcasing our expertise. Employed responsive design for cross-device compatibility and organized content for ease of navigation, ensuring a visually appealing and efficient user experience.

**Ice Cream Manufacturer Website.** Technologies: *HTML, SASS, JS, PARCEL*. This project is designed to create an example website for an ice cream manufacturer. It utilizes Parcel for project bundling, SASS for styling, and JavaScript for interactivity.

**Team project Filmoteka.** Technologies: *JS, HTML, SASS, HANDLEBARS, AXIOS, MATERIAL-DESIGN-ICONS, LODASH-DEBOUNCE, BASIC-LIGHT-BOX*. Movie Hub is a web app for searching and collecting movies. Features: search movies using keywords, manage film database (add/delete to WATCHED or QUEUE), pagination for easy navigation.

**Blog.** Technologies: *Django, HTML, JS, Django REST Framework, DBMS, Databases, SQL, PostgreSQL, model creation, Dependency Management, Responsive Web Design, Search Functionality , Views and URLs, CSS Flexbox*. This project is a Django-based blog platform allowing users to create, publish, and manage articles, manage user profiles, and interact with the content.

### EDUCATION:

**Kharkiv National Automobile Road University**

### ADDITIONAL EDUCATION:

**Fullstack Developer, IT School GoIT (2022)**

- Worked with JavaScript and React in project development.
- Collaborated with the team to ensure effective work methods.

**Python Development, Beetroot Academy (2023)**

Specialized in Python and Django development, expanding my knowledge in this area.

**SFI course, ABF - Swedish Language**

Continuing to improve my Swedish language skills.

**LANGUAGES:** English (B1+), Swedish (SFI-D), Russian, Ukrainian (native)

### SOFT SKILLS:

- Autonomous
- Conscientious
- Diligent
- Eager to learn
- Open-minded

**INTRESTS:** Information Technology, Reading, Trail Running, Photography, Cooking
